

## Cooperation between INTERALPIN and MOUNTAIN PLANET: CITY CABLE CAR SOLUTIONS 3CS as a new conference format, now also in France for the first time

With CITY CABLE CAR SOLUTIONS 3CS, Congress Messe Innsbruck, organiser of INTERALPIN, the world's leading trade fair for alpine technologies, has launched a groundbreaking new industry platform for urban cable car solutions. Following its successful premiere at INTERALPIN 2025, 3CS will now be held for the first time in cooperation with ALPEXPO as part of MOUNTAIN PLANET from 21 to 23 April in Grenoble, France, with the central congress/conference programme taking place on 22 April. The aim of 3CS as a theme and marketplace is to facilitate exchange and knowledge transfer for leading manufacturers, transport companies, authorities and planning offices, right through to political decision-makers.

**Innsbruck/Grenoble, 11/02/2026.** The development and implementation of CITY CABLE CAR SOLUTIONS 3CS is based on the growing international market demand for cable car-based mobility solutions for public transport in urban areas. Examples such as Las Paz, Mexico City and the recently opened new cable car in Paris impressively demonstrate the advantages and practicality of this technology. As the organiser of INTERALPIN, the world's leading trade fair for alpine technologies, Congress Messe Innsbruck is in close contact with the cable car industry. In agreement with the key market players, the 3CS was held for the first time in 2025 as a congress/conference format as part of INTERALPIN in Innsbruck.

### ***International cooperation: 3CS at MOUNTAIN PLANET for the first time***

This innovative impetus is provided not only by the 3CS thematic platform, but also by the long-standing partnership between Congress Messe Innsbruck and ALPEXPO in Grenoble. ALPEXPO is the organiser of MOUNTAIN PLANET, the international trade fair for mountain development, which takes place alternately with INTERALPIN. The plan is to hold 3CS alternately in Innsbruck and Grenoble from 2026 onwards.

The partnership between INTERALPIN and MOUNTAIN PLANET creates valuable synergies and strengthens international dialogue on sustainable urban mobility, confirms **Christian Mayerhofer**, Managing Director of Congress Messe Innsbruck: "INTERALPIN has established itself as the world's leading trade fair for alpine technologies and enjoys the trust of the industry. With the new event and brand CITY CABLE CAR SOLUTIONS 3CS, we are giving the topic of urban cable car solutions a clear structure and an international stage. Our goal is to establish a strong brand that corresponds to the growing interest and demand for such offerings. Congress Messe Innsbruck has a long tradition of working with ALPEXPO, and we are delighted that this cooperation is now being deepened through City Cable Car Solutions 3CS. This will enable 3CS in Grenoble to strengthen exchange, particularly in French-speaking markets, as a congress/conference format within the framework of MOUNTAIN PLANET."

**Jérôme Riff**, Managing Director of ALPEXPO, explains: "Together with INTERALPIN, we want to offer a global stage for the promising topic of urban cable car solutions. This will enable us to reach French-speaking markets in particular. The cooperation allows us to

bring together international perspectives on the development of sustainable mobility concepts. I am very pleased about this new cooperation with Congress Messe Innsbruck."

## ***Strong industrial partners and long-term prospects***

The CITY CABLE CAR SOLUTIONS 3CS industry platform is also supported by industry partners, in particular by the leading international manufacturers of ropeway technologies Doppelmayr and the HTI Group. As an international conference/meeting format within the framework of the two trade fairs for ropeway technologies, INTERALPIN and MOUNTAIN PLANET, 3CS is intended to be the central meeting place for experts, companies and decision-makers. Supported by INTERALPIN and further developed in strategic partnership with MOUNTAIN PLANET, the thematic platform is gaining international significance and reach. The next opportunity to experience CITY CABLE CAR SOLUTIONS 3CS live will be at MOUNTAIN PLANET in Grenoble from 21 to 23 April 2026. The 3CS congress/conference programme will take place on 22 April as part of the trade fair. [www.citycablecar.solutions](http://www.citycablecar.solutions)
